Professional Summary

Mobile-first software engineer with 4+ years of project experience building full-stack products, embedded systems, and AI prototypes. Skilled at translating real operational problems into reliable tools (RFID attendance, e-commerce, predictive store manager) and collaborating across hardware, backend, and UI teams. Currently delivering IEEE humanitarian and robotics challenges while specializing in Android, iOS, and AI-driven features.

Professional Experience

Lead Developer — MatlatPro Store Suite Remote 2024

- Architected a Java/MySQL desktop platform that tracks inventory, workforce, and sales, eliminating manual spreadsheets for the shop owner.
- Embedded an ML model that predicts restock and discount timing, boosting turnover decisions and reducing stockouts by 30%.

Full-Stack Engineer — Otech E-commerce Platform Tunis, Tunisia 2023

- Delivered a Next.js + Tailwind storefront with secure auth, catalog, and checkout, enabling the brand to process online orders within three weeks of launch.
- Implemented reusable UI blocks and API integrations that cut future feature delivery time by 25%.

Creator — Système de Pointage (JoJo Pointage) Ariana, Tunisia 2022

- Built an end-to-end RFID attendance suite: Arduino RC522 reader, Python listener, Flask dashboard, and SQLite logging for 20+ employees.
- Added live IN/OUT monitoring, Excel/PDF summary generator (daily/weekly/monthly), and admin-triggered email delivery, cutting HR tracking effort by 40%.

AI Developer — ASL Gesture Recognition (IEEE SIGHT) Remote 2024 – Present

- Prototyping a computer-vision model with TensorFlow/OpenCV to detect ASL gestures for accessibility initiatives.
- Leading dataset curation, augmentation pipeline, and integration plans for future mobile/web clients.

Education

ESPRIT – University of Engineering, Ariana, Tunisia 2019 – 2026 (expected)

Bachelor of Software Engineering, Mobile Development Track

Relevant coursework: Mobile ecosystems (Android/iOS), AI&ML, Spring Boot, NestJS, Symfony, IoT/Arduino, data structures and algorithms.

Skills

Programming: Java, JavaScript, C, C++, Python, PHP, SQL

Frameworks: Next.js, React, Spring Boot, NestJS, Symfony, Flask

Mobile: Android Studio (Java/Kotlin), SwiftUI, UIKit

AI/ML: TensorFlow, Keras, OpenCV, Computer Vision, Gesture Learning

Data/Tools: MySQL, MongoDB, Docker, Git/GitHub, VMware (Linux)

Soft Skills: Team collaboration, leadership, problem-solving, adaptability, customer empathy

Leadership & Affiliations

IEEE WIE Challenge — Lead developer for official event website; ensured accessible, mobile-first launch.

IEEE RAS Challenge — Exploring gesture-driven robotics control loops.

IEEE PES Challenge — Building AI + IoT dashboards for energy monitoring pilots.

Certifications

Sustainable Finance Certification (AMF) — GOMYCODE JavaScript Professional Certificate
Programming bootcamps: C/C++, Python, JavaScript

Languages

Arabic (native) — French (fluent) — English (advanced)

Interests

Open-water swimming, bodybuilding, culinary arts (chef-level cooking), humanitarian tech
